SKILLS

Technical Skills

- Language: Java
- Frontend: HTML5 | CSS3
- Backend: Java (Spring Boot) | Spring 5
- Databases: MySQL
- Frameworks & Libraries: React.js
- Cloud & DevOps: AWS (EC2, S3)
- UI/UX & Design: Responsive UI design | User-centric design principles

Problem-Solving & Algorithms

- Strong foundation in Java programming for solving problems.
- Expertise in debugging, code optimization, and improving application performance under real-world constraints.
- Practiced in competitive programming with focus on efficiency, logic building, and clean code practices.

PROJECTS

Direct Deal — *College Marketplace Platform*

- Designed and developed a college-exclusive marketplace enabling students to buy, sell, and auction products within campus.
- Implemented verified student account authentication to ensure secure, trusted transactions limited to campus users.
- Built features including favorites tracking, integrated real-time chat, and student discounts to enhance convenience and security.
- Developed a responsive UI using React.js with an intuitive design, improving user experience for seamless product discovery and purchase.
- Managed backend logic and SQL database design to support product listings, user sessions, and transaction records.

Makemysite — *AI-Powered Voice Web Builder*

- Built an AI-powered web platform that allows users to generate complete web pages through voice prompts and multi-language support.
- Implemented live code output with real-time format conversion capabilities including HTML to React and HTML to Python.
- Integrated multi-language NLP processing to interpret voice commands, making web development fast and accessible for non-technical users.
- Designed the platform interface with a focus on seamless UX, ensuring users can create and preview pages without writing code manually.

AI-Driven Test Automation Framework

- Integrated AI-powered NLP to automatically rephrase and simplify user-generated test instructions for broader accessibility.
- Built automated end-to-end testing workflows using Selenium WebDriver, implementing self-healing test logic to handle dynamic UI changes.
- Enhanced test coverage across critical application workflows, reducing manual QA effort and improving overall release reliability.
- Structured the framework to support scalable test case management, enabling teams to add and maintain tests without deep technical expertise.

EDUCATION

B.E. Computer Science and Design 2022 – 2026
Sri Krishna College of Engineering and Technology, Coimbatore | CGPA: 7.98

Higher Secondary Certificate (HSC) 2022
Erode Hindu Kalvi Nilayam Matric Hr & Sec School | 81.33%

CERTIFICATIONS

- Infosys Springboard — Java SE 8 Features
- Infosys Springboard — Spring 5 Basics with Spring Boot
- Infosys Springboard — Java Programming Fundamentals
